

# SAP for Mobile: Neptune Application Store released

---

Posted by [Njål Stabell](#) Oct 12, 2015

*Disclaimer: I am the CTO of Neptune Software*

Last week we launched Neptune Application Store. An occasion for a champagne celebration as me and my co-founder [Ole-André Haugen](#) considered this feature when we first started our company four years ago. It took a while but it is finally here.

This is the new distribution channel for free Neptune applications and code snippets provided by our team. While we provided apps as transports before, this new cloud based solution, will enable you to test, give feedback, check for updates and install the apps with a few clicks.

We have launched the first 50 apps and snippets and will add an additional 150 applications by June 2016.

This first wave includes Cross platform, HR, MM, SD, Master Data, PM and WM applications. Here is a complete [list](#)

As with all our management tools we have created the solution using our own medicine so it is a UI5 based front-end.

## SAP for Mobile: Neptune Application Store released

The screenshot displays the Neptune App Store interface. On the left, a list of 40 applications is shown, categorized into 'CROSS' and 'HUMAN CAPITAL MANAGEMENT'. The 'Timesheet Report' app is highlighted in the main view. The app details include its name, version (05.10.2015), and a status indicating the latest version is installed. Below this, there are icons for information, settings, chat, and edit. The 'Documentation' section contains an 'About' section describing the app's purpose in tracking project time and managing resources, followed by a 'Key Features' list and a 'Try Me' section with a link to 'Timesheet Reporting'. A 'Preview' section shows a screenshot of the app's dashboard, which includes a table of total hours (112.50 H), WBS elements, and employees, along with a bar chart for hours per employee.

Category	Application Name	Date	Status
CROSS	Code Snippet - App	29.08.2015	✓
	Code Snippet - SplitApp	04.10.2015	✓
	Neptune App Store	04.10.2015	✓
	Reporting Template	04.10.2015	✓
	Workflow Inbox	25.09.2015	✓
	HUMAN CAPITAL MANAGEMENT	Employee Lookup	20.09.2015
Leave Request		03.09.2015	✓
My Paystubs		20.09.2015	✓
Timesheet Approval		20.09.2015	✓
Timesheet Entry			

**Timesheet Report**  
 Your version: 05.10.2015 05.10.2015  
Version  
✓ Latest version installed

**About**  
 Time Sheet Reporting allows you to track up-to-the-minute project time and efficiently manage your resources, projects and clients. No longer will project managers make blind decisions; real-time project status enables them to be proactive, addressing problems before they become major issues. With the ability to easily navigate in views as WBS elements, Employees, Activities, Hour Types, Status and much more and jumping from one to another's. Dashboard templates for high level and graphic analysis coverage. This solution allows the user to go from a high level perspective to the detail of each record within the SAP® CATS Reporting Tool.

**Key Features**

- Offline/Online
- Overview of current calendar month of time reported, released and approved/ rejected entered time in top meny or chosen by date
- Time entry: hours or from-to towards any cost element and wage type in SAP HR
- Quick report on time entered and my absence

**Try Me**  
[Timesheet Reporting](#)

**Preview**

Time Report September 2015

Dashboard	Total	112.50 H
WBS Element's (1)	N/D	112.50 H
Employees (1)	Michaela Mater	112.50 H

Employees: Hours per employee (Bar chart showing Michaela M...)

PEP's: Hours per PEP (Bar chart showing Michaela M...)

Bottom navigation: Test, Run, Import

You will get a view of installed applications in your system, new applications from the Neptune team and updated versions of applications you already imported. You will get information about the technical name of both the application and the class and by pressing the import button you will seamlessly import these into your own system.

It is important to note that we recommend customizing and branding the applications for each individual SAP customer so we urge you to copy the application and class and "consume" these. This also let's you update the apps without any risk of changing applications that are running in production. Just add the changes you need to your copied version and have full control over the versions of your own applications.

Personally I think the code snippets are really cool and they will increase your development drastically. So if you are a Neptune developer I urge you to try them out.

Once imported you can simply right click on the tree in the Neptune Application Designer and you can save yourself hundreds of drag&drop operations.

Choosing Split app will result in this:

## SAP for Mobile: Neptune Application Store released

This one click is a huge improvement for speeding up your coding!

You can also test the applications here [Neptune Application](#)

Happy coding!
